## CLARINET MOUTHPIECES

**NEW**

The new **BG B3 mouthpiece** is designed in a biocompatible material that meets the new sanitary quality standards, and is made entirely in France. It does not cause any tarnishing of the silver on the clarinet due to sulfur fumes on the ebonite mouthpieces.

The traditional cork has been replaced by a **synthetic ring**. This allows a good tight seal and lasts a good duration of time. If the musician wishes, **the ring is interchangeable** and can be replaced by a traditional cork.

The density of the mouthpiece material is close to the density of **ebony wood** to offer an exceptional acoustic response in all registers.. **The BG B3 mouthpiece has been designed for ease of play** and it is easy to find a rich and round sound from the first note you play. With that said, the reeds recommended are reeds with a strength close to 2 and 2.5.

Thanks to its **extreme flexibility**, this mouthpiece allows great variations in dynamics while remaining homogeneous. One of the great qualities of this mouthpiece is **its versatility**, facilitating changes of style from **classical, jazz, Klezmer music to world and variety music**. Thus ideal for doublers who need to be perform in many styles and situations.

**When you choose BG B3, you choose to be free.**

DESIGNED TO BE PLAYED WITH EASE.  
RECOMMENDED REED STRENGTH:  
2 OR 2.5.

SYNTHETIC RING:  
INTERCHANGEABLE  
BY A TRADITIONAL CORK.

WHEN DETAILS MAKE THE DIFFERENCE

**BG selected ZINNER** as our MP maker partner to work on our specific requests to not only supply raw material but to do hand finishing to reach our expectations. Zinner is a German company that provided the raw materials for most popular US hand-made mouthpieces makers. Each one of the **BG B0 mouthpieces** for clarinet are hand-machined by an expert who one by one controls their production.

The result is a warm and centered sound, with great projection. The homogeneity in every register is simply impressive. The result of the exceptional quality of the raw material used is a very characteristic round sound. With years of confidential testing, we can assure that despite long years of playing, the material stays consistent and BG mouthpiece last much longer than most popular mouthpieces.

Every BG mouthpiece is really, effectively and individually tested by a professional musician before leaving the BG factory.

**BG B0 mouthpieces** are perfect for chamber music, ensembles or soloists.

**ELASTIC** STRAPS PROVIDE MORE MOVEMENT, PREVENT BAD BACK POSTURES AND HELP THE MUSICIAN TO BREATHE BETTER. **REGULAR OR NON ELASTIC** STRAPS IMPROVE THE CONTROL OF THE EMBOUCHURE. BOTH HELP TO LIMIT PRESSURE ON THE THUMB REST, ARMS, SHOULDERS AND TO PREVENT NECK STRAIN, HELPING TO BREATHE BETTER.

A TEACHER CAN FEEL MORE COMFORTABLE TEACHING WITH A REGULAR STRAP AND FIND OUT THAT DURING A CONCERT AN ELASTIC SLING WILL FAVOR THEIR GENERAL PERFORMANCE.

WHEN DETAILS MAKE THE DIFFERENCE

### THE OPINION OF THE EXPERT: MICHELLE ANDERSON

WHEN I FIRST STARTED TRYING REED PERFORMER IT WAS WITH CANE REEDS THAT WERE JUST NEARING THE END OF THEIR LIFE. I HAD A REED THAT I REALLY LIKED BUT CANE REEDS GET SOFTER OVER TIME AND PUTTING ON REED PERFORMER ON SEEMED TO JUST WARM IT UP AND GIVE IT A LITTLE BIT OF LIFE EXTENSION.

ON THE SYNTHETIC REEDS IT SEEMS TO MAKE IT SOFTER, MORE RESONANT, LESS RESISTANT OVER TIME."
